# ABOUT US

Design-21 Projects Limited is a design organisation approved under EASA Part 21, Section A, Subpart J. The organisation provides approved data and certification for minor changes and repairs to cabin interiors (including cargo compartments and electrical cabin systems) and external liveries, on both CS 23 (Small) and CS 25 (Large) aircraft.

Founded in 2019 as an aeronautical engineering firm, Design-21 Projects offers high quality interior solutions to a wide range of air operators and lessors. As such, its core activities comprise of the following:

The preparation of approved data, in the form of accomplishment instructions and drawings, for the implementation of minor changes and repairs to CS 23 and CS 25 aircraft.

The identification, assignment and interpretation of Certification Specification (CS) and environmental protection regulations.

Verification that the design is safe and meets the airworthiness requirements of the Certification Specification.

Assistance in the preparation of design data, where required.

# WHERE WE ARE

Central Business Centre  
Tarxien Road  
Gudja  
GDJ 1907  
Malta

# Who we are

Design-21 Projects Limited is a locally established EASA approved design organisation. We pride ourselves on being a hub for local talent in aerospace engineering and on embodying the Maltese values of hospitality and passion for our work, all for the ultimate benefit of our clients. Our main office is located in Gudja, a short drive away from Malta International Airport.

## HOW WE WORK

### Client-oriented & Cost-effective

As a third party service provider, Design-21 Projects Limited works for a wide range of organisations such as Airline Operators, Leasing companies, Financiers etc.

### Expertise Guaranteed

Our success is rooted in the competence, experience and tenacity of our team. The latter is composed of highly respected aviation professionals, each with their own track record of adding value through the projects they are involved in.

# SERVICES

## MODIFICATION

Designing and certifying minor changes (modifications) and repairs to cabin interiors and external liveries.

## TURN KEY PROJECTS

Delivering turnkey solutions for minor modifications from concept design through to installation and final certification.

## CONSULTATION

Providing consultation on design changes to air operators and lessors.

Design-21 Projects contributes to the aviation market by focusing its engineering services on the assessment and ultimate implementation of customer requested modifications and minor repairs onto in-service aircraft. This is accomplished by complementing and supporting OEMs, aircraft operators and leasing companies with technical support through the organisation's engineering expertise.

# ACCREDITATION

Design-21 Projects is an EASA approved DOA with approval certificate reference EASA.21J.739.

The European Aviation Safety Agency (EASA) is responsible for ensuring safety and environmental protection in air transport in Europe.

3PLEX AERO is the first locally established stand-alone CAMO providing services specifically aimed to fulfil all aviation safety requirements, help increasing safety and improving processes at reduced costs.

[www.3plex.aero](http://www.3plex.aero)

Fortrex is the first asset record company specifically aimed to Malta's aviation industry. Fortrex comprises of underground storage facilities intended to provide adequate storage place for operator/lessors asset hard copy historical records.

[www.fortrex.com.mt](http://www.fortrex.com.mt)

Aviation Maintenance Academy is an EASA approved maintenance training organisation, MT.147.09, in compliance with Section A of Annex IV (Part-147) of Regulation (EU) No 1321/2014, providing aircraft type training and other supplemental training courses.
